INSIGHT INTO THE STATE  
OF YOUR NETWORK  
ENVIRONMENT

RECOMMENDATIONS TO  
ADDRESS OR IMPROVE  
NETWORK  
PERFORMANCE

TUNE YOUR  
ENVIRONMENT FOR  
MAXIMUM EFFICIENCY &  
EFFECTIVENESS

Networks are the foundational backbone for an organization's data center. Network-related problems and connectivity disruptions affect everything from virtualization, backups, application functionality to internet access.

IVT's Network Assessment service conducts a thorough analysis and diagnostic review of an organization's network environment so that your IT team can have clear visibility into current and potential issues present in the system.

The key deliverable is a health check report that provides insights into potential or current issues and/or performance bottlenecks in the network infrastructure. This includes health check parameters, identified issues or bottlenecks, configuration improvements & areas requiring urgent attention.

Our senior consultant will review actions required if any to address specific issues to improve the performance of your network.

We recommend that a Network Security Assessment be run in conjunction with this service.

### PHASE 1: DATA COLLECTION

Our senior consultant will work with your team to capture relevant data, system logs and run appropriate diagnostic tools to create a baseline picture of the state of your network environment.

### PHASE 2: ANALYSIS

- Assess collected data and review appropriate or relevant system logs
- Outline areas requiring attention according to severity and/or priority
- Identify areas of improvement in configuration, software or device according to industry best practices

### PHASE 3: RESULTS & BRIEFING

- Present findings in a health check report
- Explain implications and outline actions required to address current and/or potential issues
- Discuss possible improvements in procedure or configuration according to best practices
- Outline a roadmap of possible investments to upgrade the network where required

### BENEFITS

- Understand how well your network is configured according to best practices
- Identify potential or actual performance bottlenecks
- Optimize your network health and performance

### SCOPE & PRICING

- One IVT Senior Consultant for Workshop Discussions & Final Report
- Actual man-days depend on customer requirements
- Please contact our service representatives for a discussion
