

# Virtualization Health Check

## ENSURING THE HEALTH OF YOUR VIRTUALIZED IT

### AT A GLANCE

A HEALTH DIAGNOSTIC SERVICE FOR YOUR VIRTUALIZED ENVIRONMENT

### DELIVERABLES

REPORT ON CURRENT OR POTENTIAL ISSUES AND PERFORMANCE BOTTLENECKS

RECOMMENDED ACTION PLAN

### BENEFITS

INSIGHT INTO THE STATE OF YOUR VIRTUALIZED ENVIRONMENT

RECOMMENDATIONS TO ADDRESS OR IMPROVE THE VIRTUALIZED INFRASTRUCTURE

TUNE YOUR ENVIRONMENT FOR MAXIMUM EFFICIENCY & EFFECTIVENESS

Increasingly, virtualization forms the heart of any organization's IT infrastructure. The breath of a virtualized environment involves the organization's investments in servers, storage and network. It is therefore critical to know how well your virtualized infrastructure is functioning.

Focusing on industry leading platforms such as VMware vSphere®, IVT's Health Check Service conducts a thorough analysis and diagnostic review of an organization's virtualized environment so that your IT team can have clear visibility into current and potential issues present in the system.

The key deliverable is a health check report that provides insights into potential or current issues and/or performance bottlenecks in the virtualized environment.

Our senior consultant will review actions required if any to address specific issues to improve the performance of your infrastructure.

### PHASE 1: DATA COLLECTION

Our senior consultant will work with your team to capture relevant data, system logs and run appropriate diagnostic tools to create a baseline picture of the state of your virtualized environment.

### PHASE 2: ANALYSIS

- Assess collected data and review appropriate system logs
- Outline areas requiring attention according to severity and/or priority
- Identify areas of improvement in configuration according to industry best practices

### PHASE 3: RESULTS & BRIEFING

- Present findings in a health check report
- Explain implications and outline actions required to address current and/or potential issues
- Discuss possible improvements in procedure or configuration according to best practices

### BENEFITS

- Understand how well your environment is configured according to best practices
- Identify potential or actual performance bottlenecks
- Optimize your virtualized environment for maximum efficiency and effectiveness

### SCOPE & PRICING

- One IVT Senior Consultant for Workshop Discussions & Final Report
- Actual man-days depend on customer requirements
- Please contact our service representatives for a discussion
